PRINTED CARPETS

Printed Carpet is a machine-made Carpet which is based on the printing process. The process can be divided into fabric, top, and yarn. And the carpet surface is composed of various forms such as elbow yarn, loop pile jacquard, open loop combination, Etc. The Printed Carpet is famous for its rich patterns, strong sense of stereoscopic, good elasticity, high color fastness, anti-mildew, anti-insect and so on.

Material

Nylon, Polyester, Polypropylene, Wool.

Paving districts

Hotel rooms, corridors, banquet halls, public areas, home living rooms, computer rooms, Etc.

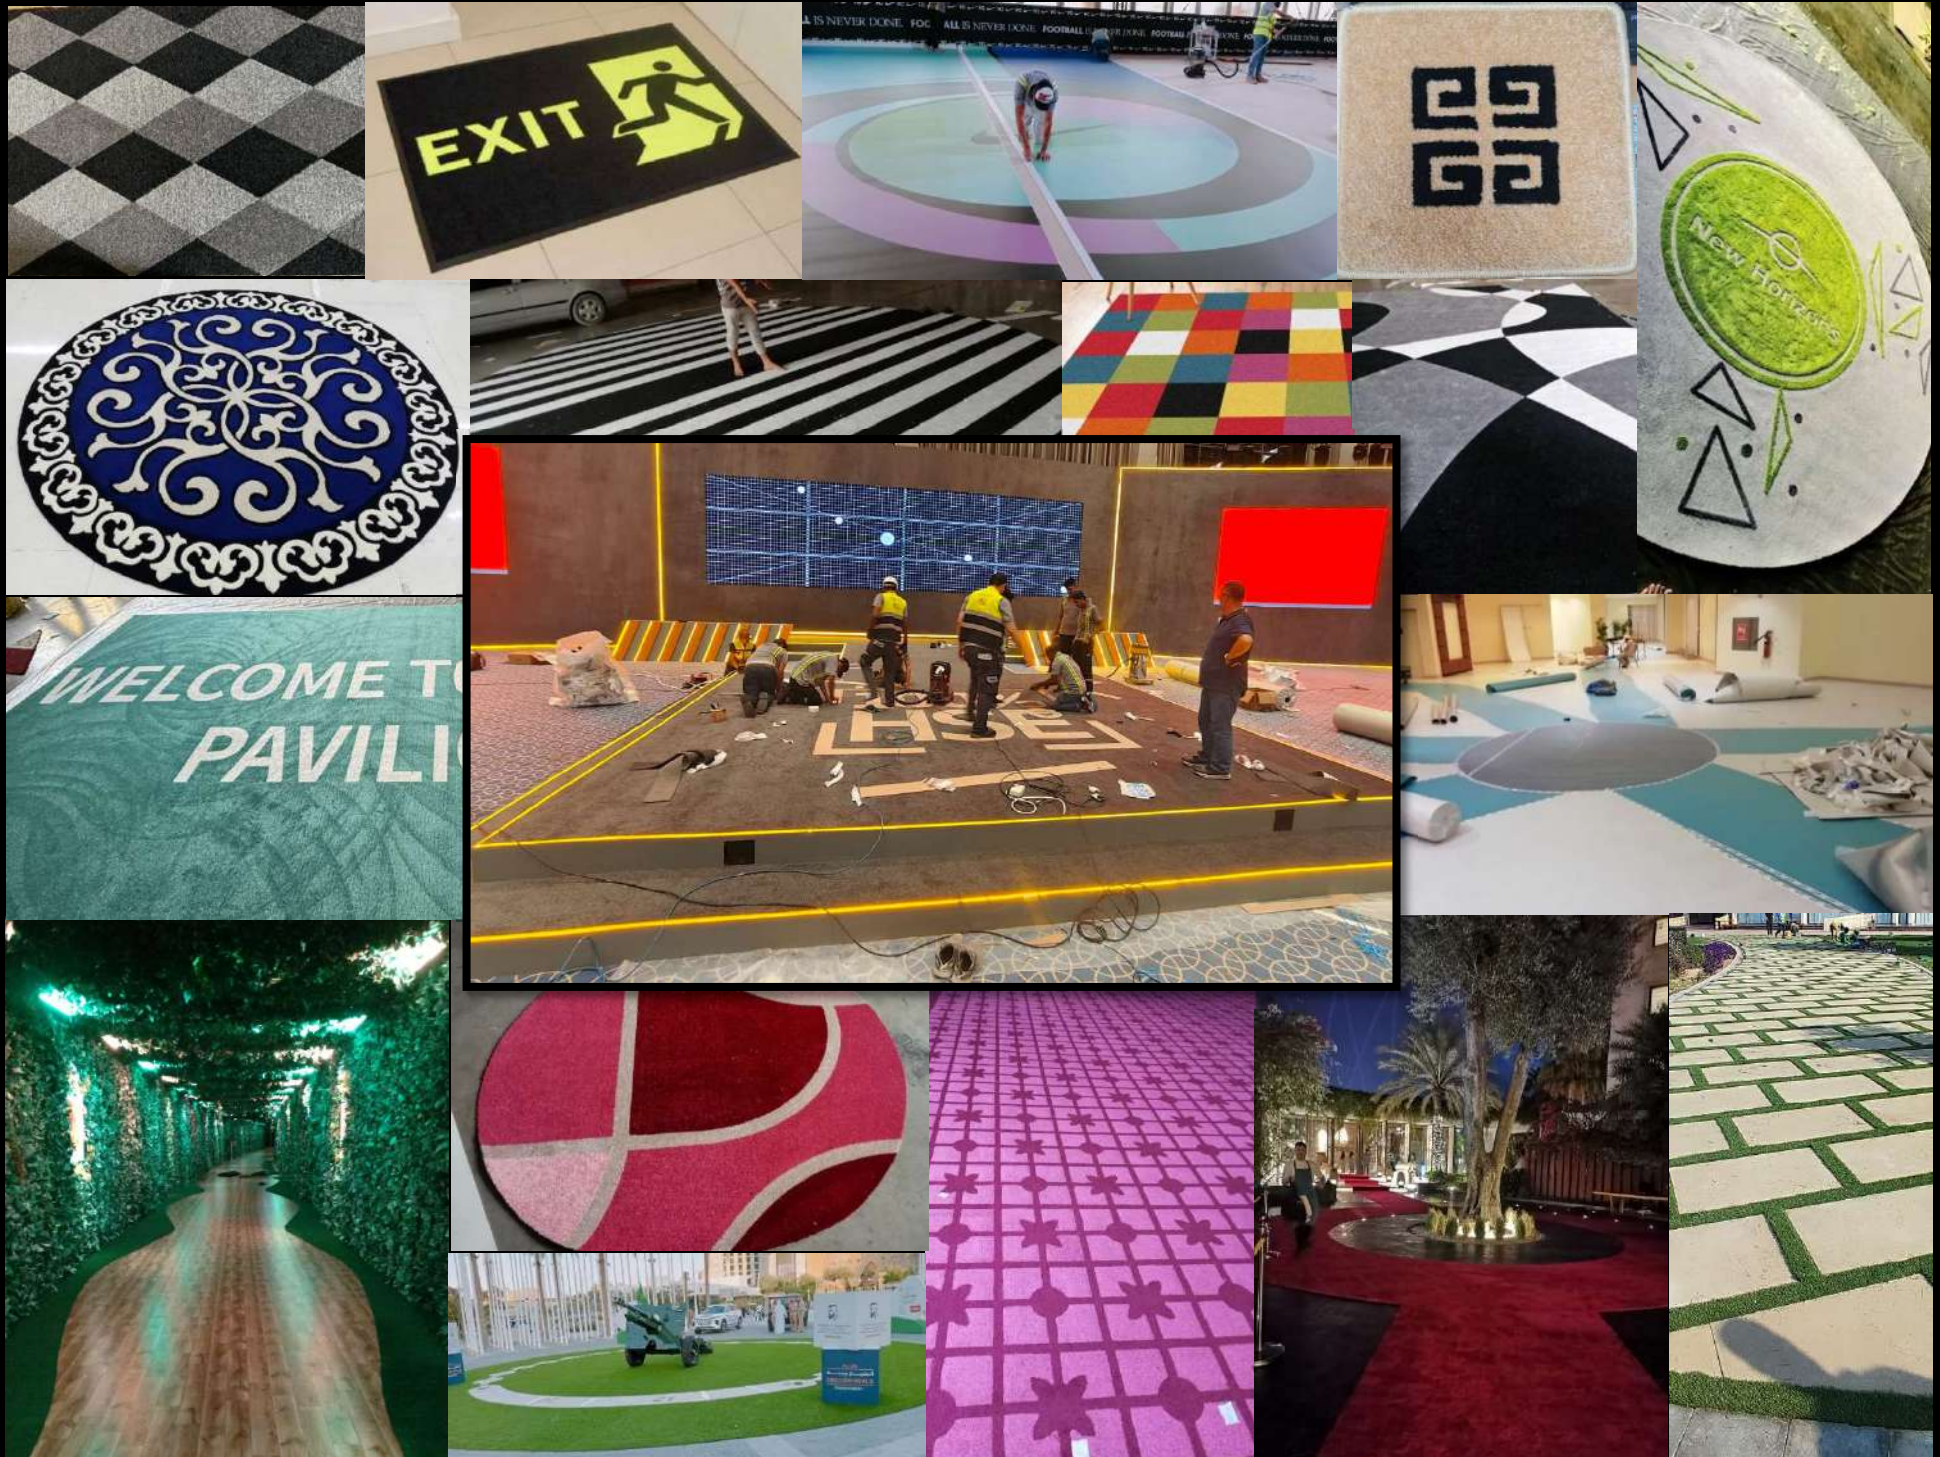

ACRYLIC CARPETS

Acrylic mosque carpets have emerged as a contemporary alternative to traditional woolen or cotton options, prized for their durability, aesthetic versatility, and ease of maintenance. Composed of synthetic acrylic fibers known for their resilience and color retention, these carpets offer a luxurious look without the high maintenance of natural fibers. They are crafted through a process involving wet spinning of acrylic polymer into filaments, which are then tufted into a dense pile on a sturdy backing material. This manufacturing method ensures they withstand high foot traffic typical in mosque settings while retaining vibrant colors and softness over time.

Our Acrylic Mosque Carpets are crafted to meet the specific needs of mosque environments, combining durability with comfort. These carpets offer superior stain resistance and easy maintenance, ensuring they remain pristine for years to come.
